

"GEDCOM" application for Android Smartphones

Management up to 3000 people possible

Marc DANIEL - Décembre 2020

Installation

- 1- Download the GEDCOM.apk file to your Android device and install it
- 2- Allow the application access to the internal memory of your device
- 3- Before you can use the application, you need to download a GEDCOM file which can come either from an online genealogy platform (Filae, Geneanet, MyHeritage, for example) or from genealogy software. In all cases, the genealogies created on these online platforms or with specialized software can be "exported" in the form of a file called "GEDCOM" (Filename.GED)

Download one or more GEDCOM file (s) to your device. This or these files will be saved in the downloads of your device ("Download" directory of the internal memory).

Select a GEDCOM file (Filename.GED)

The application will extract a database from the GEDCOM file. The corresponding files will be created and saved in a directory called "GEDCOM" and created in the internal memory of your device.

When the database has been created. You will have access to the complete alphabetical list of all the people listed in the source GEDCOM:

Select the chosen person from the drop-down list with a long press ...

2535- SEGUIN ROSIER Alexandre Léonard Robert ♂
born on 21 april 1885
in Trinité (972)

2536- SEGUIN ROSIER Anne-Marie ♀
born on 30 september 1858
in Trinité (972)

2537- SEGUIN ROSIER Jean Chrisostome Henri ♂
born on 27 january 1888
in Trinité (972)

2538- SEGUIN ROSIER Jean Lazare ♂
born on 22 may 1780
in Tartane (Trinité) 972

2539- SEGUIN ROSIER Jean Lazare ♂
born in 1749
in Tartane - Trinité (972)

2540- SEGUIN ROSIER Louis Léonard ♂
born on 06 march 1854
in Trinité (972)

2541- SEGUIN ROSIER Marie-Anne Rosie ♀
born on 05 november 1819
in Trinité (972)

2542- SEGUIN ROSIER Marie-Louise ♀
born in 1850
in Trinité (972)

2543- SEGUIN ROSIER Marie-Thérèse Solange ♀

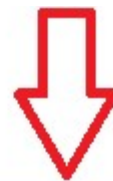

You can manually scroll through the list to reach the person whose individual record you want to view. If your genealogy is important, it is possible to speed up the scrolling by using the round and blue cursor located on the right, with this cursor, the scrolling is done very quickly by hundreds of people at a time ...

To select a person, press and hold the selected name.

How an individual file works

Click on the name of the father or mother to go back to the previous generation

Joseph Léopold Sigisbert HUGO

Sophie TRÉBUCHET

Return to the selection list.

Victor
HUGO ♂

born on 26 february 1802 in Besançon (Doubs)
passed away on 22 may 1885 in Paris-16ème

Ecrivain Poète

Click on a spouse's name to display their file

Union with Adèle Julie Victoire M FOUCHER the 12 october 1822 in Paris-6ème

Union n°2 with Juliette DROUET le à Paris

Scroll through the list of children to click on one of them

Children from the first union
Child n°1 of 5 Léopold HUGO

successive returns to the previous screen and finally exit the application after your confirmation

Possible modifications

It is possible to personalize the application by adding photos of existing people in this genealogy under the following conditions:

Connect the Android device to a PC with the USB cable and in the connection parameters, choose the option: "USB - File transfer"

In the internal memory of your device, you will find the file "**ListeAlpha.txt**" in the directory named "**GEDCOM**" and the location for storing photos is the sub-directory "**MEDIA**" in GEDCOM.

You can add (or modify or delete) a photo of a person:

1- By modifying the end of the line concerning this person in the "**ListeAlpha.txt**" file which includes one line per person knowing that the persons are classified in alphabetical order of family NAMES.

The name of the photo must be added at the end of the line just after the § sign (delete "VIDE")

examples: **§ArseneLUPIN.PNG** or **§Tartempion.jpg**

2- Then you have to copy the corresponding photo in the **MEDIA** sub-directory. Be careful, the name of the photo must be exactly the same as the name registered with **ListeAlpha.txt** otherwise the photo will not be recognized. Avoid spaces and accents. You can also simply change the existing photo keeping the same name.

If you delete a photo, the line corresponding to the person must end with: **§VIDE**

For the curious, separation codes used in the file "**ListAlpha.txt**":

NAME | First name * PersonalCode @ Sex [date of birth] place of birth {date of death} place of death \$
profession or function £ parents family code % CodeUnion1 ♪ CodeUnion2 ♪ CodeUnion3 §
PhotoName.PNG or jpg or jpeg

NB - The management of unions n ° 3 has been abandoned because it posed too many technical problems, so you will not find anything after the sign ♪

(Personally, I use this site to select veterans of the great war)

Be careful, you must save **ListAlpha.txt** after modifications and not **ListAlpha(1).txt** for example.
